Separately Managed Account (SMA)

Strategy investment philosophy

Although the strategy is permitted to invest in companies of any size, it is anticipated that the portfolio will invest primarily in common stocks of mid-, small- and micro-cap companies, with market capitalizations within the ranges defined by the Adviser. Therefore, most of the companies in the portfolio can be expected to have a market capitalization of \$10 billion or less, as measured at the time of purchase.

Buy discipline

The Adviser favors companies with one or more of the following attributes:

- Favorable stock price in relation to cash flow, earnings, dividends, book value and asset value
- Strong historical and prospective growth potential
- Catalysts including changes in operations, management, capital allocation, strategies or product offerings, which have a favorable impact on shareholder value

Sell discipline

Stocks are sold when:

- Price exceeds our estimate of intrinsic value
- Company fails to achieve expected financial results
- Economic factors or competitive developments adversely impair the company's value
- Company becomes a violator of any moral screen established by the Catholic Advisory Board

The Morningstar Ownership Zone™ provides detail about a portfolio's equity investment style by showing the range of stock sizes and styles. A portfolio's Ownership Zone™ is derived by plotting each stock in the portfolio within the proprietary Morningstar Style Box™. The shaded area represents the center 75% of the portfolio's assets, and it provides an intuitive visual representation of the area of the market in which the portfolio invests. A "centroid" plot in the middle of the Ownership Zone represents the weighted average of all the portfolio's holdings. A portfolio that is concentrated will have a small Ownership Zone relative to the area of the style box, and a broadly diversified portfolio will have an Ownership Zone that stretches across many sizes and styles. Over a period of time, the shape and location of a portfolio's Ownership Zone may vary.

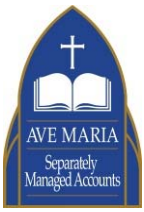

IMPORTANT INFORMATION FOR INVESTORS

The investment performance assumes reinvestment of dividends and capital gains distributions. The Russell 2000® Index is an unmanaged index of the smallest 2,000 stocks in the Russell 3000® Index. The S&P 600® SmallCap Index is an unmanaged index created by Standard & Poor's made up of 600 small-cap companies. Both indexes are commonly used to show the performance of small-cap stocks. Indexes do not incur fees and it is not possible to invest directly in an index.

Past performance is not a guarantee of future results. Performance can be affected by market and investment style risk. The account's investments in small- and mid-capitalization companies could experience greater volatility than investments in large capitalization companies.
