The Fund is classified as non-diversified and may therefore invest a greater percentage of its assets in the securities of a limited number of issuers than a fund that is diversified. At times, the Fund may overweight a position in a particular issuer or emphasize investment in a limited number of issuers, industries or sectors, which may cause its share price to be more susceptible to any economic, business, political or regulatory occurrence affecting an issuer than a fund that is more widely diversified. The issuers that the Fund may emphasize will vary from time to time.

Investment Philosophy

Adviser uses fundamental security analysis to identify and purchase shares of companies that are believed to be selling below their intrinsic value. The Adviser looks for companies whose market prices are below what a corporate or entrepreneurial buyer would be willing to pay for the entire business. They intend to hold securities for an average of 3 to 5 years under normal market conditions.

Growth of Hypothetical \$10,000 Investment³ (FROM 10/1/10 – 9/30/20)

Buy Discipline

Adviser favors companies with:

- Favorable stock price in relation to free cash flow, earnings, dividends, book value and asset value
- Large-cap domestic companies with fortress-type balance sheets
- Catalysts including changes in operations, management, capital allocation, strategies or product offerings, which have a favorable impact on shareholder value

Sell Discipline

Stocks are sold when:

- Price exceeds our estimate of intrinsic value
- Company fails to achieve expected financial results
- Economic factors or competitive developments adversely impair the company's value

Mutual Fund investing involves risk, and principal loss is possible. Performance can be affected by market and investment style risk. The Fund's investments in small- and mid-capitalization companies could experience greater volatility than investments in large-capitalization companies. Price/Earnings ratio (P/E ratio) is a valuation ratio of a company's current share price compared to its per-share earnings. P/E equals a company's market value per share divided by earnings per share. Forecasted P/E is not intended to be a forecast of the fund's future performance. Annual Turnover Ratio is the percentage of the fund's assets that have changed over the course of a calendar year. Mutual funds with higher turnover ratios tend to be less tax efficient and have higher transactional costs.

The investment performance assumes reinvestment of dividends and capital gains distributions. The quoted performance for the Fund includes performance of RCM Partners Limited Partnership for periods prior to July 20, 1993. It should be noted that: (1) the Fund's performance includes performance for periods before the Fund's registration statement became effective; (2) the Fund was not registered with the Securities and Exchange Commission and, therefore, was not subject to the investment restrictions imposed by law on registered mutual funds; and (3) if the Fund had been registered during such periods, performance may have been adversely affected. The S&P 1500® Index includes all stocks in the S&P 500®, S&P 400®, and S&P 600®. This index covers 90% of the market capitalization of U.S. stocks. Indexes do not incur fees and it is not possible to invest directly in an index. **Prospective investors should read the prospectus carefully and consider the Fund's investment objectives, risks, charges and expenses carefully before investing. The prospectus, which can be obtained by calling 1-800-449-9240 or online at www.schwartzvaluefocusedfund.com, contains this and other important information.** Distributed by Ultimus Fund Distributors, LLC.
