### Buy Discipline

The Adviser strongly considers the following factors:

- All securities regardless of maturity
- Issuer's credit strength
- Securities effective duration and yield

### Investment Philosophy

The strategy seeks to invest in securities that appear comparatively undervalued. For example, it would consider a security having a yield that is higher than another security of similar credit quality and duration to be comparatively undervalued. Unlike portfolios investing solely for income, the strategy also seeks modest capital appreciation and growth of investment income.

### Sell Discipline

Securities are sold when:

- They no longer meet criteria for investment
- More attractive opportunities available
- Company becomes a violator of any moral screen established by the Catholic Advisory Board
