The Adviser favors companies with one or more of the following attributes:

- History of dividend increases
- Potential for above-average earnings and dividend growth
- Excess free cash flow to support future dividend increases
- Pricing power
- Sustainable competitive advantage and leading market position
- Reasonable valuation

### Investment Philosophy

The Adviser believes that a long record of dividend increases is an excellent indicator of a company's financial health and growth prospects, and that a growing stream of income can contribute significantly to total return. Rising dividends may reduce volatility during periods of market turbulence and minimize downside risk.

### Sell Discipline

Stocks are sold when:

- Price exceeds our estimate of intrinsic value
- Company fails to achieve expected financial results
- Economic factors or competitive developments adversely impair the company's value
- Company becomes a violator of any moral screen established by the Catholic Advisory Board
